~ UNFOLDING PARTITION ~

What is the initial spatial qualities for the house?

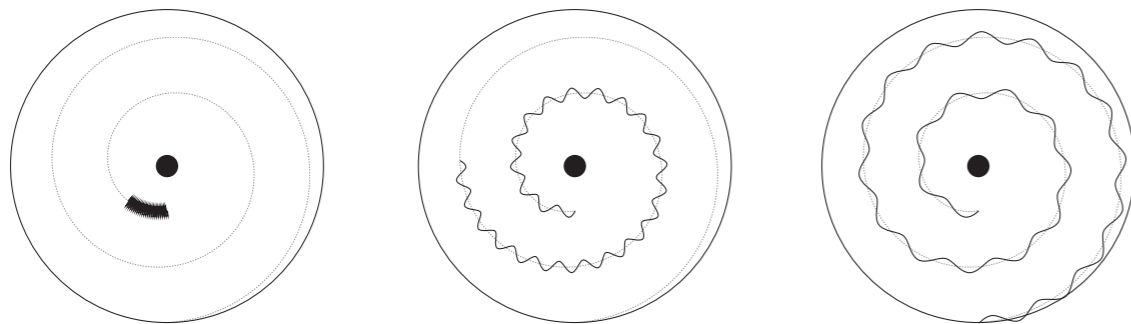

Before human know a house.
Before human know a building.
Before human know an architecture.

The essential quality of space for inhabited is the quality of separation.
Separation create various types of space such as private space, public space, and so on.

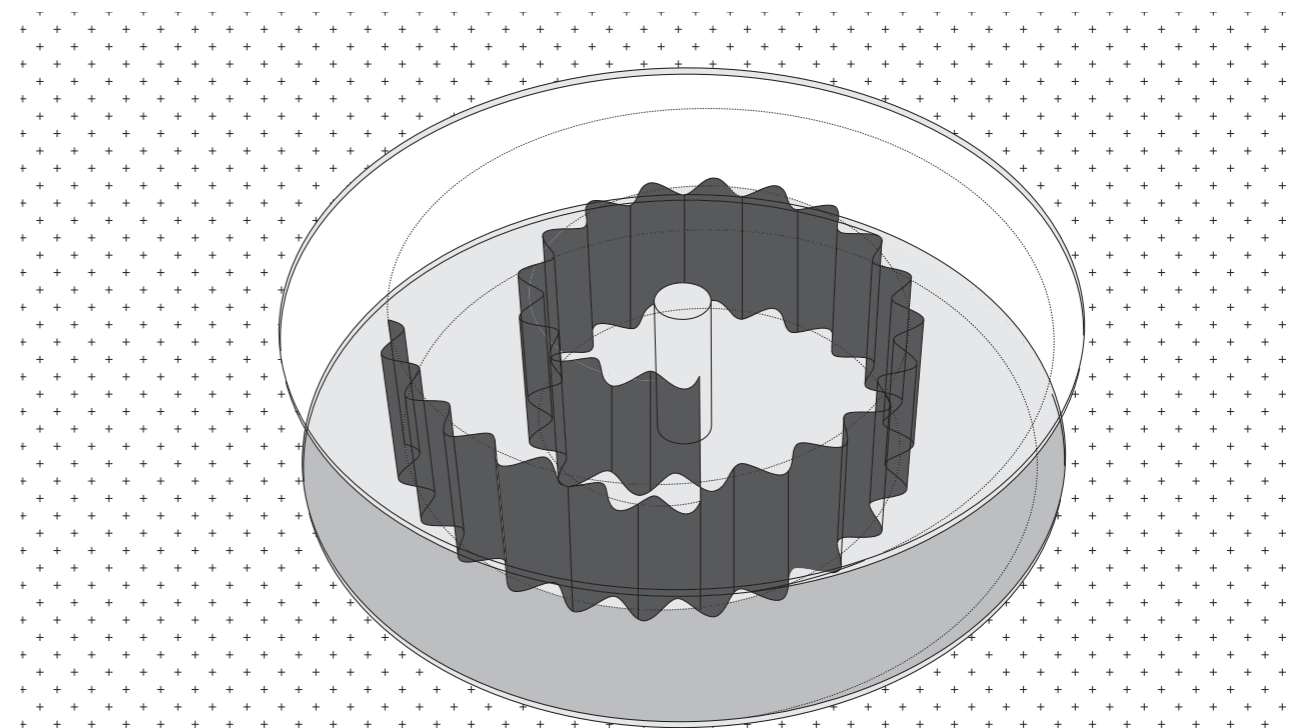

- Moreover -

Sometime human need to be separated from environment.
Sometime human need to be the part of environment.

The project focuses on how to make various spaces by using separation.
This separation should produce the inner space that will be connected or separated to outer space.

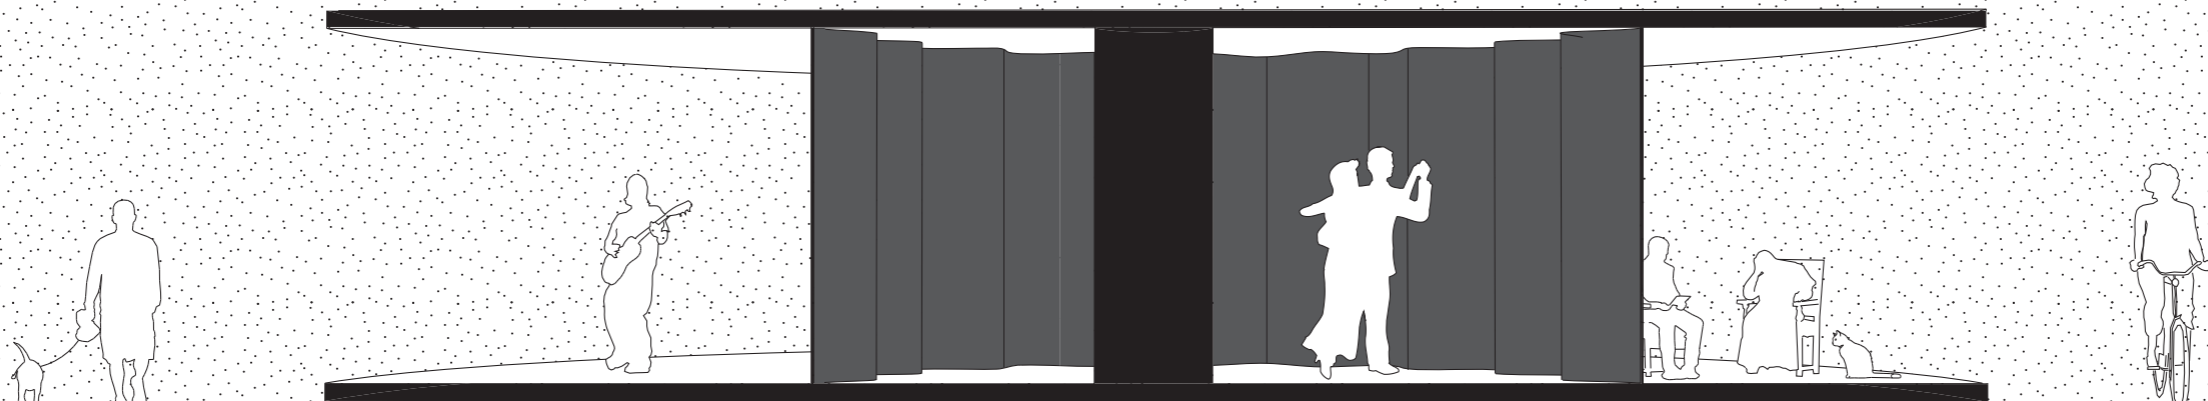

LESS ← ————— SEPARATED ————— → MORE

{ Circle + Spiral }

Without function, it does not means no possibility to have functions within space.
In contrast, it is means that function can take place everywhere within the space.

The circle was chosen to be the shape of this house.
Without corners, circle as infinite canvas for things spread around the space without focus points.
The spiral is also the basic curvature line that was chosen to address the idea of separation.
Because spiral produce the multi-layer divide between inner space and outer space,
the spatial qualities that was created by the dense of spiral's twist.
