

The Joint Box

A "BOX" is a vacant sensual space ,
 space is beauty of mind ,
 mind is creation of thought
 thought are reflection of inner beauty
 beauty the first sense
 sence is the nature
 and adoration of nature iS "JOINT"

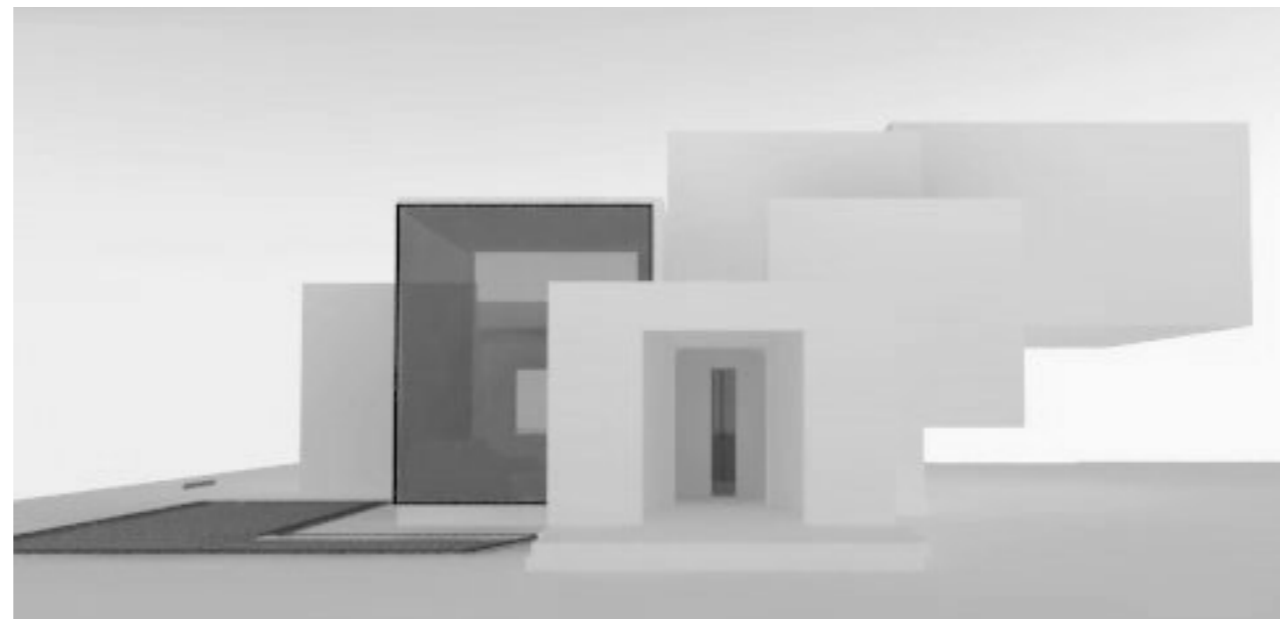

The secret to brilliant poetry lies in its gradual and uninterrupted flow from one verse to the other. Similarly this ease needs to be translated into spaces and the way their functions mingle.

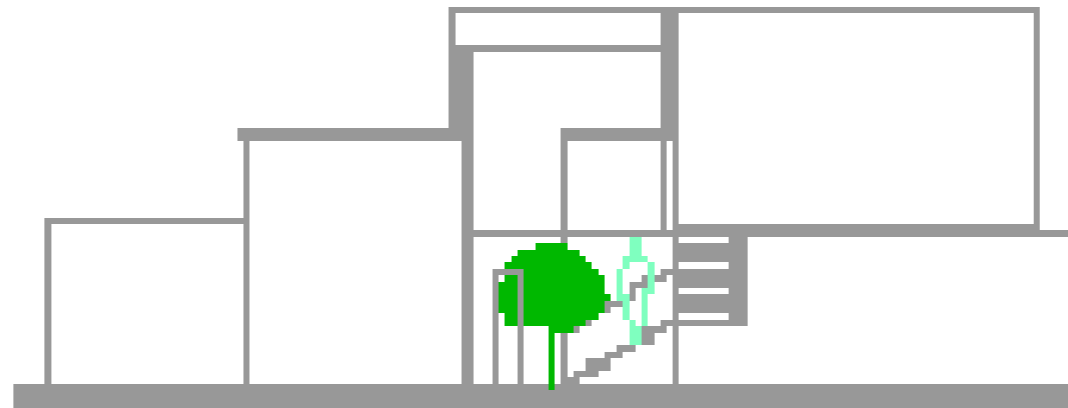

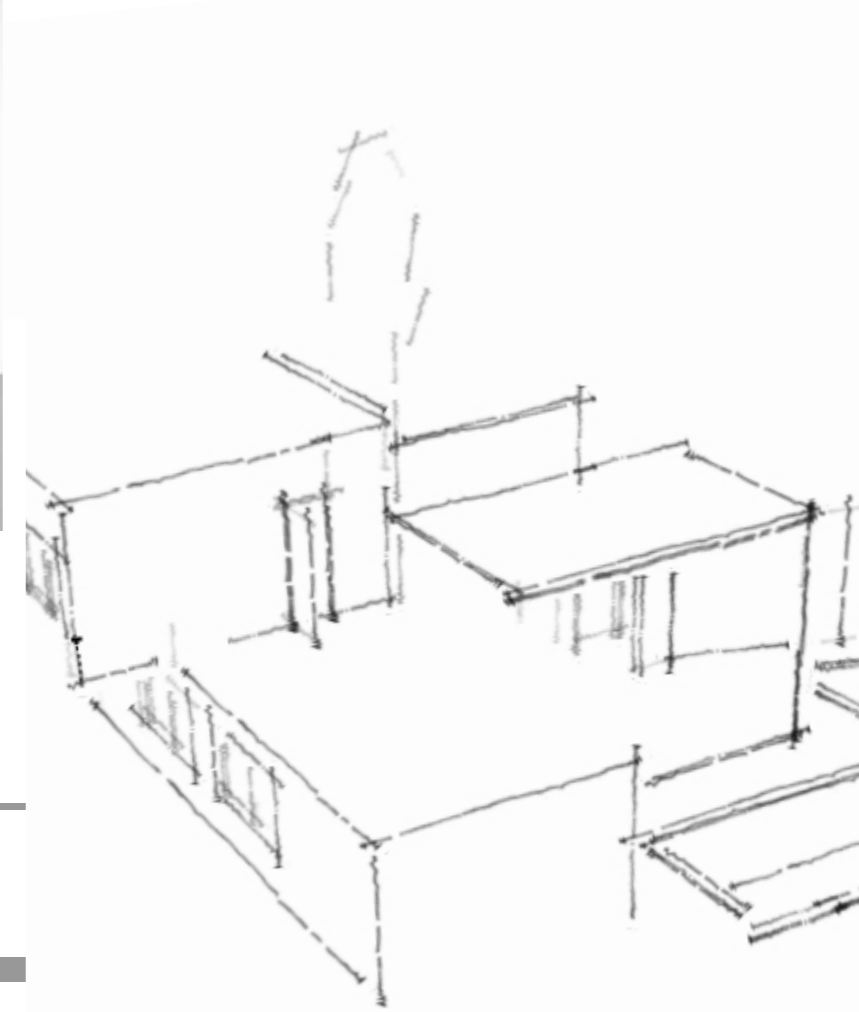

The Joint Box concept encompasses various concepts to achieve this ease in its design. Another aspect of poetry that brings it to life is its communication of emotions. Emotions arise from Nature, and instantaneously give presence to the space.

The Joint Box aims to achieve emotions in the occupied space
 - A space well defined by straight lines.

The motion within the space reflects the evolution of emotion through a walk from a scared space to a slit of desire and beauty, with the edge of priority for path, either towards a glass with square with ups and down or toward silence of nature, leading toward the serenity of placid room ending with the wholeness of space for freedom, maturity, relaxation and dreams
