

**CONCEPTION**

During designing we took account of such basic viewpoints as orientation, environmental factors, climatic conditions and client needs. The basis of our concept is to make the view and panorama a part of the building and this way a part of the life of the school. This idea resulted in a dining room which starts in the building and ends in a roofed terrace and looks on the northeast mountain range. The library which is next to the dining room opens also to this terrace. This panoramic terrace is a great opportunity for those who like to read or have a meal in a relaxing place.

**USE OF MATERIAL**

We took the surrounding buildings in consideration when selecting the building materials, casing and plaster. The buildings around are made of stone and wood and have light colours.

**DINING ROOM**

We cross clear-out lines with playful world and colours. The dining room has a warming kitchen with a service counter and a dining area for forty.

**LIBRARY**

We are focusing on showing not only the books but the panoramic view as well. Huge windows attract the eyes to look on the magical lands of South China.
