

Its time to know your self before you  
die in quest to know the unviverse

TEAM 8062

POD SECTION

POD VIEW

Our concept is to revive the form of communication that is on the verge of extinction i.e. self communication

In the hustle of the busy urban life the biggest issue with the competitive population is stress. People hardly spent time to meditate or to understand what is happening in and around them. They are running like castles in order to quench their thirst to discover the universe and on other hand going away from their inner self.

PLATFORM FOR STAR GAZING AND SMALL  
GROUP INTERACTION

Our proposal is a couple of peace towers which shall have a platform at top for star gazing and pods around the central shaft were one can take a break from the busy life and relax with a mesmerizing view of city and stars.

The zeal of communication is to make things easy better transparent and continent for human race. Hope this shall help the human race to evolve for a better being.
