No smartphones No WiFi No Internet

Hi

Hi, what's up?

I'mafine, thx

But I'm realy tired

All day at work on the Internet

And now, Facebook, Instagram, emails etc...

Yeah, I know what u mean

We are wasting too much time

Sometimes I meet with friends and we spend most of the time with our phones

Facebook, Instagram, SnapChat.. We talk a little...

Sometimes

I think the world's going wrong way..

What do u mean?

I mean.. the social media

computers and phones take a lot of time and we don't remember about important things

Family, friends..

Physical contacts

That's sad

You are right, I can't deny

All this is going in a wrong way

We don't need another app

We just need to find a way to meet, without phones

You mean.. sth special where people could stop time and spend it together w/o coverage, wi-fi, phones..etc??

The main problem of communication is the internet, smartphones, laptops etc. In our world there are many distractions.

Have we forgotten how to meet someone and talk?

We are thinking about creating an opportunity for the real conversation.

Rooms like that should exist in each city for everyone, for free.

There should be no WiFi, no Internet, and no mobile phones.

(WiFi, Internet, and mobile phones are not allowed).

All you have to do is talk.
