

# CELL - SPACE - ROOM

a rom for jail prisoners, mentally ill recluse and, in general, everyone

**Is in the lack of communication that you can discover the deep beautiful of it.**

If you think about a prisoner and his small cabine to communicate with his visitor, separete by a glass; if you think about a sick contagious man, recluses in a room, if you think about a mentally ill little girls that can't sleep with his parents.

A concept room divided by a big wall of glass.

A bed, or beter two bed, in the center of it.

A big skylight to watch the sky.

A device to read a book togheter, to listen music.

The visitor can bring a USB key and share images and memories with the "recluse".

The parents can sleep with their son again.

## System XY

The device that allows the visitor to listen to music, audiobooks and draw in company with the person behind the glass.
