

LETTER DROP

Communication is a part of day to day life. We communicate with each other through different mediums. There has been a continuous development on the methods of communication and this has raised by technology so high that it has enclosed us in digital screens. We have been lost in this reel world that we build which end up isolating us. Counteracting this we have approached to built a room which will encourage the use of letter in a form of writing communication between the user in an stimulating and unusual way.

PLAN
Scale - 1:100

HAVE YOU EVER THOUGHT OF POSTING LETTER WITHOUT ACTUALLY POSTING IT.

Architecture has invariably taught us to believe that buildings are communicators, Man writes on earth through buildings which can then be read as text to denote their functions, the period and context they are built in.

The function of the space in and around runs in such a way that it will encourage people to grab a pen and write down their thoughts...

HOW WOULD YOU FEEL IF YOU DOESN'T KNOW WHOM YOU ARE TALKING TO BUT STILL FEEL CONNECTED?

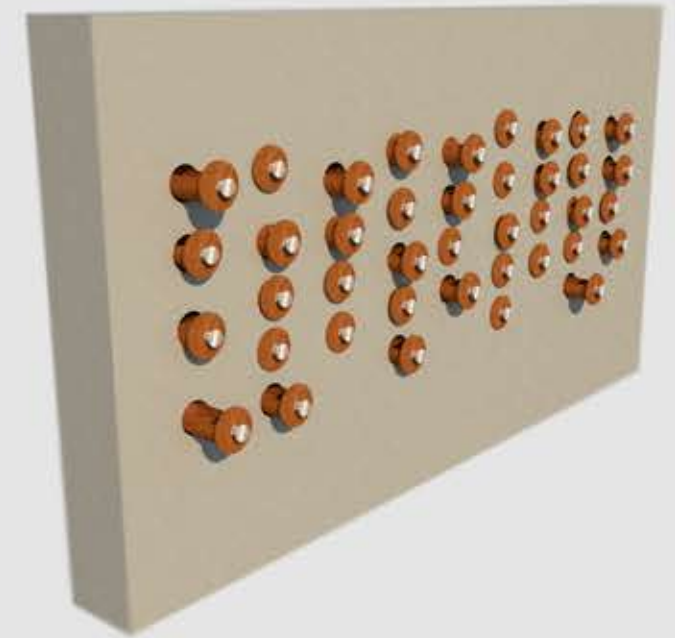

WRITING TO UNKNOWN PERSON IS STRANGE RIGHT OR IS IT FUN??
SO WE ARE PRESENTING A LETTER DROP ROOM THAT RUNS WITHOUT A POST MAN.

The design creates a space where communication can be promoted through letters. Through writing people will be physically involved with the activity and as writing requires neatness, grammar, proper format, they will be consciously present in the present world .

The space consists of a cafe which acts as a gathering place to invite people to the letter drop room. The cafe is enclosed by rooms on both side. One side is where people will write a letter for the first time. And the other side will be a reply area room where replies from the letter written by stranger will be placed. This way people will often come and get involved with this letter chain. The letters will be store in a locker which is a part of the wall. The wall will be punctured and lockers is placed on the punctured walls.
